

TraditionDATA

Lightends

TraditionDATA's daily and intraday price assessments show futures prices for the prevailing standardised lightend contracts. Prices are quoted in mid format and are expressed in USD per MT, per BBL, or per GAL for each product and as a differential between products for the majority of contracts. Historical data is available by request.

Update frequency:

Daily (EOD broker file) or intraday (model-derived snapshots)

Methodology:

- ▶ EOD broker prices are based on expert assessment of daily activity in covered markets. Displayed prices do not represent currently actionable orders.
- ▶ Model-derived prices are based on a combination of electronic data feeds and broker input. Displayed prices do not represent currently actionable orders.

Curve coverage:

Curve coverage is dependent on market activity, and levels of granularity may fluctuate based on changes in liquidity.

- ▶ EOD broker curves typically span approximately 16-28 months, 4-9 quarters, and 1-3 calendar years.
- ▶ Model-derived curves typically span 12-48 months, 4-16 quarters, 2-7 halves, and 1-4 calendar years.

Lightends – EOD
