

TraditionDATA EU Emissions

TraditionDATA's real-time price assessments show futures prices for the prevailing standardised European emissions contracts. Prices are quoted in bid/offer format and are expressed in Euros per allowance. Historical data is available by request.

Update frequency:

Real-time

Methodology:

Data displayed on Trayport represents current, actionable market activity.

Curve coverage:

Curve coverage is dependent on market activity, and levels of granularity may fluctuate based on changes in liquidity. Real-time data reflects the extent of Tradition's intraday activity on the Trayport platform. Curve granularity is based on the breadth of this activity at any given point in time.

EU Emissions

Any products that the desk is active in (varies based on changes in liquidity). Current examples include:

EUA

UKA
