

TraditionDATA

Natural Gas Liquids

TraditionDATA's daily and intraday price assessments show futures prices for the prevailing standardised NGL contracts. Prices are quoted in mid format and are expressed in US cents per GAL or dollars per MT for each product and as a differential between products for the majority of contracts. Historical data is available by request.

Update frequency:

Daily (EOD broker file) or intraday (model-derived snapshots)

Methodology:

- ▶ EOD broker prices are based on expert assessment of daily activity in covered markets. Displayed prices do not represent currently actionable orders.
- ▶ Model-derived prices are based on a combination of electronic data feeds and broker input. Displayed prices do not represent currently actionable orders.

Curve coverage:

Curve coverage is dependent on market activity, and levels of granularity may fluctuate based on changes in liquidity.

- ▶ EOD broker curves typically span 30 months, 9-10 quarters, 0-1 halves, and 1-2 calendar years.
- ▶ Model-derived curves typically span 23-48 months, 7-16 quarters, 3-7 halves and 1-4 calendar years.
