

TraditionDATA

US Fuel

TraditionDATA's daily and intraday price assessments show futures prices for the prevailing standardised US fuel contracts. Prices are quoted in mid format and are expressed in USD per BBL for each product and as a differential between products for the majority of contracts. Historical data is available by request.

Update frequency:

Daily (EOD broker file) or intraday (model-derived snapshots)

Methodology:

- ▶ EOD broker prices are based on expert assessment of daily activity in covered markets. Displayed prices do not represent currently actionable orders
- ▶ Model-derived prices are based on a combination of electronic data feeds and broker input. Displayed prices do not represent currently actionable orders

Curve coverage:

Curve coverage is dependent on market activity, and levels of granularity may fluctuate based on changes in liquidity.

- ▶ EOD broker curves typically span approximately 14-19 months, 5-7 quarters, and 2 calendar years
- ▶ Model-derived curves typically span 12-60 months, 4-20 quarters, and 1-6 calendar years
