

TraditionDATA

EU Natural Gas

TraditionDATA's daily and real-time price assessments show futures prices for the prevailing standardised EU natural gas contracts. Prices are quoted in midpoint or bid/offer format and are expressed in Euros per MWh, USD per MMBtu, or GBP per THM. Historical data is available by request.

Update frequency:

Daily (EOD broker file) or real-time (Trayport)

Methodology:

- ▶ EOD broker prices are based on expert assessment of daily activity in covered markets. Displayed prices do not represent currently actionable orders.
- ▶ Data displayed on Trayport represents current, actionable market activity.

Curve coverage:

Curve coverage is dependent on market activity, and levels of granularity may fluctuate based on changes in liquidity.

- ▶ EOD broker curves typically span 1-3 front months, 1-3 quarters, 1-5 seasonal strips, and 1-4 calendar years.
- ▶ Real-time data reflects the extent of Tradition's intraday activity on the Trayport platform. Curve granularity is based on the breadth of this activity at any given point in time.

EU Natural Gas – EOD
