Product Notification

UPDATE: Retirement of Legacy Refinitiv Packages

As part of Tradition's plan to re-structure the availability of our data across Refinitiv's enterprise products, TraditionDATA is retiring some legacy data packages and replacing them with a new suite of more granular data products.

The extra choices enable customers to pick and choose the appropriate packages dependent on their specific requirements. The re-structuring reflects Tradition's findings on data consumption through discussions with our client base and our desire to provide data services that meet client demand.

Three specialist data services that are being retired are as follows:-

- Tradition Interest Rate Derivatives (Rates) – PDP code SDTFSDSIR
- Tradition FX & Money Markets – PDP code SDTFSDSMM
- Meitan Tradition Interest Rate Options – PDP code SDTFSMEDSIRO

The effective end-of -life date for these packages will be **6 July 2020**.

All existing customers licenced to the above legacy packages will be required to transition to the new services, which are now live. If you have any questions or require further information, please contact your local TraditionDATA office via the contact details listed below. Our Sales and Support teams will be happy to provide all the assistance you need as we make this transition with you.

Refinitiv has also released a data notification (DN107061) to its customers.

TraditionDATA provides consistent, high-quality financial market data that reflect real price interest in global OTC swaps markets, covering FX & Money Markets, Interest Rate Derivatives, Credit & Fixed Income, and Energy & Commodities. Data can be delivered directly from Tradition or from one of our distribution partners, which include, among others, Bloomberg, CME, ICE and Refinitiv.
