

# TraditionData USD SOFR Products

TraditionData's SOFR packages provide the most robust, comprehensive and accurate view of the American Markets.

The Federal Reserve Bank of New York began publishing the Secured Overnight Financing Rate (SOFR) in April 2018.

## SOFR Packages from TraditionData.

Our analytics team use Repo order and transaction data, sourced from our leading USD Repo business in New York, to create a forward prediction of the SOFR fixing.

In addition to the use of USD Repo data, we take into account events such as end-of-month corporate tax days where demand for cash increases, producing a more robust forward looking curve.

Tradition dominated the Inter-Dealer Broker USD rates market in 2022 in terms of volume of trades. This means you can count on our data to provide the most robust, comprehensive and accurate view of the market through packages that best meet your needs.

SOFR data is available via direct feed from TraditionData, on Bloomberg under TIRS and through Refinitiv under USDSROIS=TRDL.

## What is SOFR?

As an ARR, SOFR is based on transactions in the US dollar overnight repurchase agreement (repo) market, making it a highly reliable and transparent benchmark.

The transition from LIBOR to SOFR will be complete on 30th June 2023.

“ We continue to outperform our competitors. In 2022 Tradition represented 35% of all Inter-Dealer market activity in the USD rates market.

This means you can count on our data to provide the most robust, comprehensive and accurate view of the market through packages that best meet your needs.
